A small increase in the price of a meal can cause a diner to spend much less - by choosing less expensive items or a less expensive restaurant. Event with a 1% tax increase customers experience sticker shock when the bill comes, and as a result they tip their server less.

Requires postage.

A small increase in the price of a meal can cause a diner to spend much less - by choosing less expensive items or a less expensive restaurant. Event with a 1% tax increase customers experience sticker shock when the bill comes, and as a result they tip their server less.

Requires postage.

FACT: Every \$1.00 spent in restaurants generates an additional \$1.19 in sales for other industries in the state. Every dollar not spent at a restaurant will harm other businesses too.
